

SULB FACT SHEET

سولب

ABOUT SULB

Established in 2008, SULB is a specialised, fully integrated producer of structural steel sections. Operating an integrated steel plant in Bahrain and a light and medium section rolling mill in Saudi Arabia, SULB stands at the core of the region's steel industry. The company offers a comprehensive product portfolio that includes DRI, billets, blooms, and light, medium, and heavy structural steel sections. With a strong regional footprint and global reach, SULB serves international markets while meeting a significant share of structural steel demand across GCC countries.

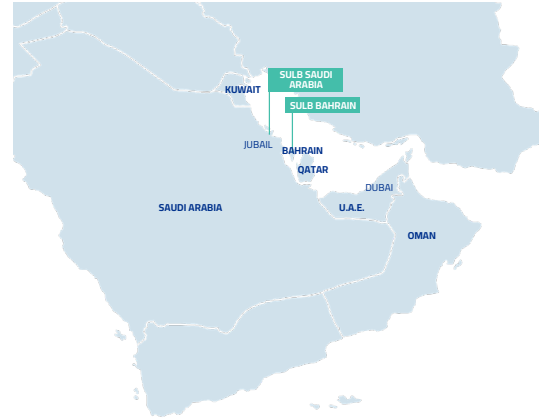

SULB OWNERSHIP

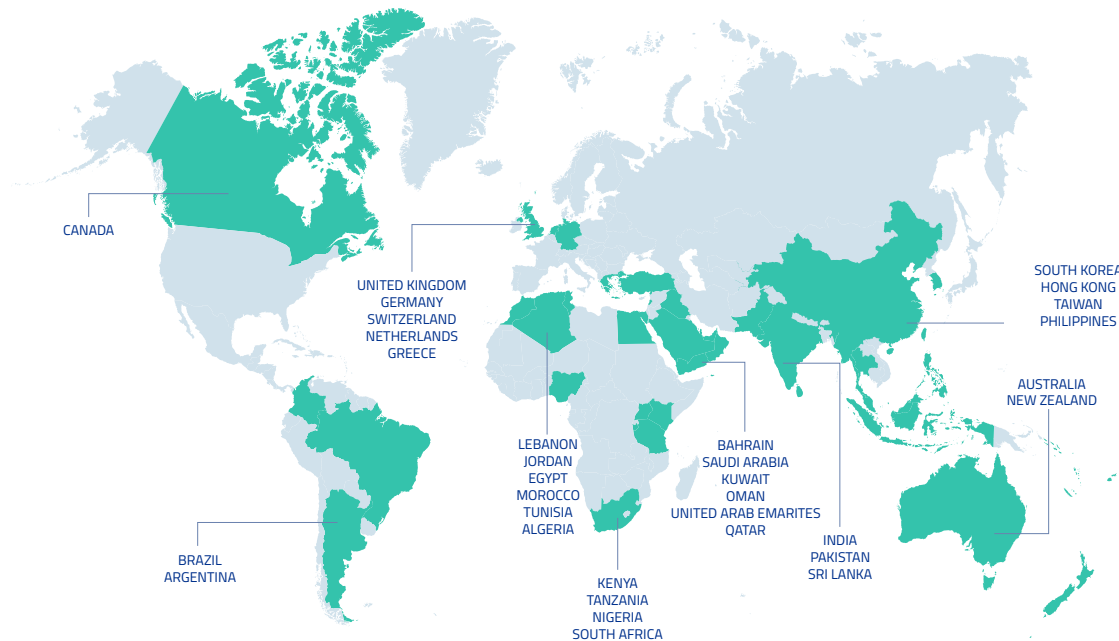

SULB is a wholly owned subsidiary of Foulath Holding, a Bahrain-based industrial group with a strong presence across the regional steel value chain. Foulath is backed by a consortium of reputable GCC partners, including Gulf Investment Corporation (GIC), Qatar Steel, Gulf Cable and Electrical Industries Company, National Industries Group Holding, and Kuwait Foundry Company. This strong shareholder base reinforces Foulath's position as a key industrial player in the GCC and underpins SULB's operational strength and long-term growth.

WHERE WE ARE

There are two SULB plants, one in Hidd, Bahrain and another in Jubail, Saudi Arabia. The distance between the two by sea is 84 nautical miles (roughly 154 kilometres). Together, the two plants cover an area of 540,000 square metres – 5.4 square kilometres.

DISTRIBUTION NETWORK

OUR MISSION

To help build great things

OUR VISION

To lead the steel industry towards sustainability, so we can build a world where people and planet can thrive.

CORE VALUES

We put our core values into action everyday by using these guiding principles to empower our work with customers, supplies, communities and one another.

CARE

RESPECT

COLLABORATION

LIMITLESS THINKING

PERSONAL EMPOWERMENT

OUR SUSTAINABILITY BUSINESS PRIORITIES

Operational Improvements

Greener Raw Materials

Cleaner Power Sources

Offsetting Residual Emissions

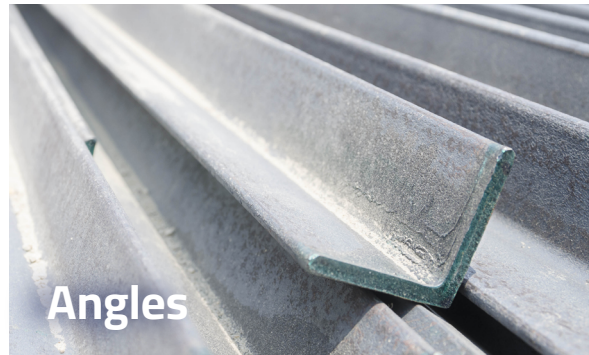

Hydrogen Technology

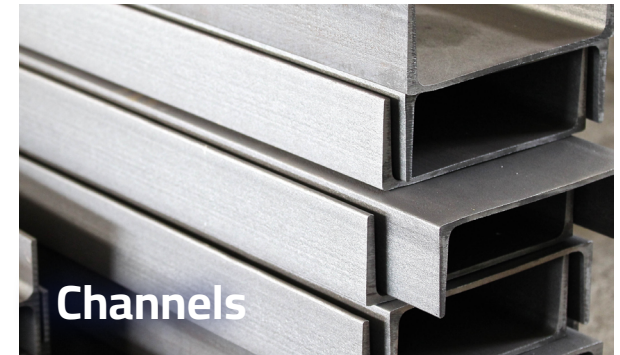

SULB produces **1.7 Mtpa of Direct Reduced Iron** from iron ore pellets manufactured by sister-company Bahrain Steel, **1.2 Mtpa of steel** and delivers almost **800,000 tons of finished beams, angles and channels** along with its sister company in Al Jubail, Saudi Arabia.
